

Store Information

CHANGING STORE INFORMATION DISPLAYED ON WEB SITE

Each place where data is used to display store information it is set by a variable that you can control in {{config.master}}.

In the default layouts we have store name, address and phone numbers at the bottom of the left nav. These are controlled by “G.Left” variables below such as : `session.GLeftCompany` as shown below.

The sendmail variables are used to control from where email is sent and to whom it is sent.

Config.master file:

```
<cfset session.storeURL="alpha25.uniformdealers.com">
<!---set storeURL for use in links that need a base href ---->

<cfset session.storeName="Model Store">
<!---set storeName for use templates---->

<cfset session.myaccountlink= "1">
<!-- set to 1 if you want a link in order confirmation to my account page --
-->

<cfset session.storeState = "Illinois">
<!------ set real store state value here ---->

<cfset session.sendemailfrom = "support@uniformmarket.com">
<!----- address which should be used for FROM label on order----->

<cfset session.sendemailto = "info@uniformmarket.com;">
<!------who should get order notification ----->

<cfset session.sendemailBCC = "sample@uniformmarket.com">
<!------who should get order notification ----->

<cfset session.contactemail = "support@uniformmarket.com">
<!------contact form email----->

<cfset session.GLeftEmail = "info@uniformmarket.com">
<!------Email on left nav----->

<cfset session.CContactEmail = "support@uniformmarket.com">
<!------Email on contact page----->

<cfset session.GLeftCompany= "UniformMarket">
<!------Company on left nav----->

<cfset session.CContactCompany= "UniformMarket">
```

```
<!------- Company on contact page----->

<cfset session.OrderEmailCompany= "UniformMarket">
<!------- Company on order email----->

<cfset session.GLeftStreet = "633 Skokie Blvd">
<!-------Street on left nav----->

<cfset session.CContactStreet = "633 Skokie Blvd">
<!-------Street on contact page----->

<cfset session.OrderEmailStreet = "633 Skokie Blvd">
<!-------Street on order email----->

<cfset session.GLeftCity = "Northbrook">
<!-------City on left nav----->

<cfset session.CContactCity = "Northbrook">
<!-------City on contact page----->

<cfset session.OrderEmailCity = "Northbrook">

<!-------Fax on left nav----->

<cfset session.CContactFax = "(224) 406-8840">
<!-------Fax on contact page----->

<cfset session.OrderEmailFax = "(224) 406-8840">
```

```
<!--Fax on order email-->
```

CHANGING THE MAPS ON CONTACT PAGE

The system default templates have a single map on the contact page. This map has a large and small view. The smaller view is what is on the page and there is a button to view the larger map.

To set these up you can just go to maps.google.com and enter the address you need into the search bar.

Next, click on the “Link” link in the upper right hand corner of the displayed map.

Then click on the link [“Customize and preview embedded map”](#)

Copy and paste the code that is generated into your map variables

```
<cfset  
session.googleMapSmall="http://maps.google.com/maps?f=q&hl=en&geocode  
=&q=633+skokie+valley+northbrook+il&sll=37.0625,-  
95.677068&ssp=44.339735,90.703125&ie=UTF8&ll=42.175427,-  
87.807198&spn=0.020358,0.044289&z=14&iwloc=addr&output=embed&  
amp;s=AARTsJoQvB50GWqrdak_alYvZX1Rf48fNg">  
  
<cfset  
session.googleMapLarge="http://maps.google.com/maps?f=q&hl=en&geocode  
=&q=633+skokie+valley+northbrook+il&sll=37.0625,-  
95.677068&ssp=44.339735,90.703125&ie=UTF8&ll=42.175427,-  
87.807198&spn=0.020358,0.044289&z=14&iwloc=addr&source=embed"  
>
```
